

Navigation and Ancillary Information Facility

“Start Programming” Lesson

May 2007

Start Programming Examples

Navigation and Ancillary Information Facility

- **The lesson provides language specific versions of a simple program to retrieve the Toolkit version string then output the string.**
 - The lesson presents the example program coded in:
 - » **FORTRAN - SPICELIB**
 - » **C - CSPICE**
 - » **IDL - Icy**
 - » **MATLAB - Mice**
- **Note, this lesson does not describe the use of all NAIF supported compilers or platforms.**
